

Compliance, Simplified: Get Started with Instant Diner Participation Reports

Regular assessments and ongoing monitoring of residents' health and well-being are common requirements across many State Regulations, particularly for Assisted Living Communities and Nursing Homes. An important indicator for a required wellness check is an unexpected missed meal.

MealSuite's **Diner Participation Reports** help you stay compliant with automatic digital logs of diner participation, so your team is instantly alerted of unusual activities. Plus, you'll be able to instantly provide proof of provision of service, in the case of an inspection.

Built into our Point of Sale System, instant digital logs track and identify when a resident has missed a meal, or several meals, in a row.

Settings include the ability to flag residents who dine with you only for specific meals, as well as a space for notes to indicate the “reason for meal refusal”, helping to keep the report accurate and streamlined.
