

Integrated Point of Sale (POS) Solution for Senior Living Communities

For Restaurant-Quality Service Matched With The Personalized Care Your Residents Deserve

Support Quick-Service & Self-Service

Offer a true “grab-n-go” experience from anywhere with the ability to scan or weigh items and offer charge options for pre-packaged or self-serve meals. Your residents will love the **Self-Service Kiosk** that allows for rapid and efficient purchases, while saving your team some time from having to cover the checkout.

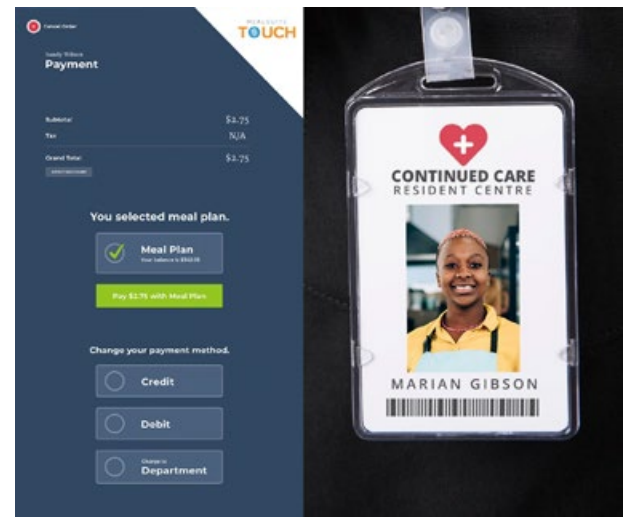

Use One System For Your POS and Resident-Centered Meal Selection Needs

MealSuite is fully integrated from the kitchen to your dining room, restaurants or café! Staff can take resident orders rapidly with real time data (diet orders, preferences and more), in room service settings or at the tableside. Orders taken via tablet print in the kitchen for tray lines or can show on kitchen display screens so your team has ideal "heads up" views of production needs if you're doing short order prep.

Customize a Variety of Meal Plans & Charge Accounts for Residents, Visitors & Staff

We offer a variety of convenient payment options including declining balance and points plans, charge accounts with payroll deduction, gift cards, credit cards and cash so you can offer a purchasing experience suited to your exact needs while boosting the ease of transactions for everyone in your community.

Engage Residents and Their Families

Create an engaging web presence with our **Family Portal** and **Nutrition Portal** that include direct menu publishing, nutritional information, special foodservice events and more to engage and impress prospective residents and families.

Fully Integrate with Your Back Office

Centralized meal service management means foodservice leadership or your head office can watch employee workflow, generate financial reports, track nutritional & budgetary goals and more so you can pinpoint areas for improvement.

Why Choose MealSuite's Point of Sale Solution?

- ✓ No on-site server requirements means lower cost & less IT support
- ✓ Easy setup & ongoing management
- ✓ Designed specifically for senior living
- ✓ Flexible to meet your needs now & into the future
